I. How to Start the CD-ROM

The followings are procedures to start the CD-ROM.

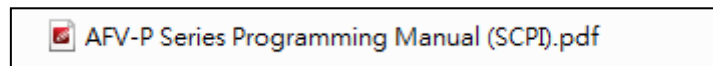

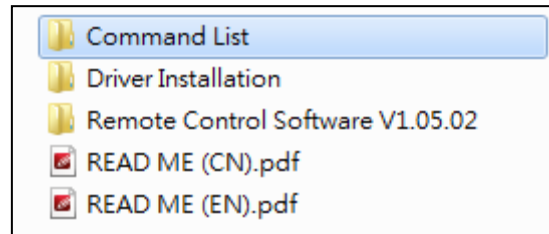

1. Insert the CD-ROM into the CD-ROM drive.
2. Click on "My Computer".
3. Click on the CD icon, and there will be three folders and this README file.

Three folders include "Command List", "Driver Installation" and "Remote Control Software".

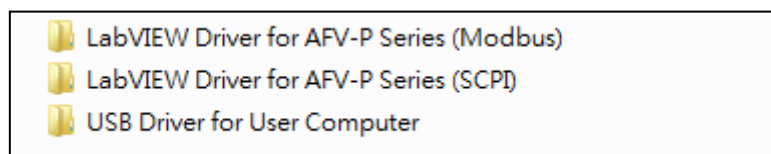

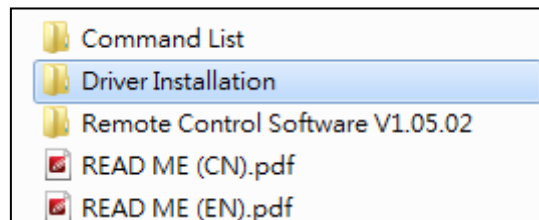

II. Folder: Command List

To find SCPI command list for the AFV-P series, please click on the folder “Command list”, and then there will be the PDF file named “AFV-P Series Programming Manual (SCPI)”. This PDF file provides SCPI programming manual for the AFV-P series.

III. Folder: Driver Installation

To install device driver, please click on the folder “Driver Installation”, and then there will be three folders, including “LabVIEW Driver for AFV-P Series (Modbus)”, “LabVIEW Driver for AFV-P Series (SCPI)” and “USB Driver for User Computer”. The previous two folders are used for LabVIEW Driver Installation according to user command type; the last folder is used for USB driver installation.

IV. Folder: Remote Control Software

To remotely control the AFV-P series via remote control software released by Preen, please click on the folder “Remote Control Software”, and then there will be the file named “setup.exe”. Click this file and follow the installation instruction to install the remote control software.
